

Honda Gas Compressor

Honda Gas Compressor
MCH6 / SH

Coltri, one of the leaders in providing high quality compressors, has met nearly all their customers needs with the numerous varieties that they have offer. We, at Mermaid, are pleased to be in partnership agreement with a firm like Coltri. Here you will find the gasoline version of the high pressure compressor.

Coltri manufactures this unit using powercoated steel to ensure a long life in the marine environment. This unit has a 3.5 CFM charging rate and will take approximately 20 minutes to fill a cylinder up to the US standard of 225 bar. It is an "open air" design meaning that the

optional compact case is not used in order to provide a base unit. Even though this unit may be the entry level unit, it will still more than satisfy our users intending on filling their cylinders. Optional add on's are also available including; additional whips, remote start/stop, auto stop, and auto bleed. Contact the Mermaid factory for additional details! Keep in mind, upgrading to a stainless steel unit is only an additional \$300.00! See below!

Price \$3,090.00

Coltri MCH6 / SH Compressor

CFM - 3.5

Filling time - 20 min.

Working pressure - 225 bar (3200 psi.)

RPM pumping unit - 2800

Driven by - Honda gasoline engine

Fuel consumption - 1.04 quarts/hour

Dimensions - L = 30.7" x H = 13.7" x W = 12.5"

Dry weight - 81.7 lbs.

Noise - 87 db

Number of stages - 4

Filtration - filter cartridge active carbon and molecular sieve

Breathing air - DIN 3188 EN 12021 CGA E
