

Mermaid's Drawer Unit

Mermaid's Drawer Unit
MM15DR

Welcome! Here you will find the newest line to the Mermaid Refrigeration product line. The "MM15DR" unit was developed after numerous requests were made to our firm for a unit that can be utilized under a settee seat or lower compartment aboard any vessel. In this location the unit is out of the way yet fully functional for a quick access and great refrigerated storage!

The MM15DR unit is manufactured out of high grade polished "mirrored" stainless steel for an attractive yet durable machine! This product operates on either 12 or 24v and can also be upgraded to operate on 12/24v and/or 110/220v using the exclusive Danfoss Conversion Module. This adds a nominal expense to the product, however, it creates the opportunity for the unit to run on any power supply provided on the vessel with the added benefit of auto change-over! This unit will automatically detect the 12 or 24v and will automatically detect the 12 or 24v and / or the 110 / 220v! You have to do nothing! Remember, **GENEROUS** discounts are applied if you are an OEM or Dealer of the Mermaid Products.
